4. Notice for Soldering

4.1 Recommended Reflow Temperature Profile

- Profile measuring point

The temperature profile indicates the board surface temperature at the point of contacts with the connector terminals.

- Reflow cycles

Up to 2 cycles of reflow soldering are possible under the same conditions.

* Temperature between 1st and 2nd reflow must be cooled down to room temperature

- Reflow heating method and condition

Far-infrared heater and hot convective blowers used in combination.

Nitrogen atmosphere is recommended.

- Top surface of the contact leads may not covered by solder depending on reflow condition

4.2 PCB Designing

RECOMMENDED PCB LAYOUT (TOP-VIEW)

(REFERENCE ONLY)

4.3 PCB Thickness

Applicable PCB thickness is 0.65mm or over considering 0.45mm DIP leg length
